

## Loxa Low Energy Lighting

Low energy lighting has moved on considerably, even from the traditional low energy compact fluorescent bulbs. Jack Pennington Ltd has teamed up with Loxa lo energy lighting to offer an ever expanding range to replace traditional lighting systems.

LED lighting systems offer up to 50% energy saving over even compact fluorescents and come in a wide range of fittings offering replacements for GU10's, PL compact fluorescents, fluorescent tubes and floodlights.

Loxa's Induction lighting is more suitable to outdoor applications and high bay use, replacing metal halide and sodium vapour lamps, not only do these lamps produce significant energy savings, up to 50%, they are also instant start and flicker free.

Jack Pennington Ltd are so convinced of the energy efficiency and longer life benefits of these low energy lamps that we are in the process of replacing our traditional lighting systems with Loxa LED and Induction lamps.

If you have a requirement for low energy lighting, please contact us to discuss your requirement, Loxa will be able to provide additional assistance if necessary.
