Erico TSGB Stud Mounting Bracket

The unique, one piece, break apart design of the Erico TSGB (Telescopic Screw Gun Bracket), makes the mounting of boxes and conduit between studs easier than ever. Simply snap the brackets apart, slot the two together, bend the ends to match the desired depth of box being fit, adjust the length to fit the stud spacing and screw into place. TSGB's are available in two sizes to cover stud spacing of 280-458mm and 432-660mm.

Markings on the bracket ensure the boxes and fittings are set to the correct depth and position between the studs allowing for fast, very accurate and neat installation. Multiple boxes up to a depth of 54mm can be mounted on each bracket. Frequently spaced pilot holes allow boxes and fittings to be easily attached with self tapping screws using only a screwdriver.

If you have a requirement to mount boxes and fittings within a stud wall, then please give our Customer Services a call or contact your Area Sales Manager.

Key Product Features:

- Faster box and conduit mounting
- Accurate spacing and control of depth
- Adjustable for non standard stud spacing
- Screwdriver only tool needed
- Compatible with boxes up to 54mm in depth
