

BLADE RUNNER SWA WIRE STRIPPER

Easy to use giving a perfectly straight cut with no sharp edges leaving the cable ready for safe termination to glands or fittings.

Cutting the outer sheath of SWA 3 & 4 core up to 25mm² cable, then scores the SWA strands which protect the inner conductors from damage guaranteeing a fast, accurate & straight cut.

Utilises fixed blade and roller system to perfectly score internal steel wire.

Easy to use – offer the cable up to the tool, turn the thumbscrew into the cable until it is relatively tight and spin the Blade Runner around the circumference of the cable in the direction of the arrow on the tool, tightening occasionally as it cuts through the sheath and then scores the steel wire.

After scoring the steel wire, the tool is removed and the PVC sheath is pulled off the end of the cable. The scored steel wire can then be removed by working back & forth until they snap off.

The blade is good for 100 terminations and is easily replaced.

The tool comes with one spare blade, further blades available in packs of three

Key Product Features:

- Cuts fast
- Cuts clean
- Cuts safe
- Perfect cut every time
- Revolutionary tool for stripping steel wire armoured cable
- Significantly increases accuracy & productivity
- Comes with spare blade
